

# Large Pipe Chimes and Bells

## How it was made:

To make these pipe chimes, we used repurposed pipes cut to different lengths. We drilled holes into the pipes and threaded them on reclaimed wire. To make the bells, we drilled holes into cups and bowls and screwed them into the reclaimed crossbeam.

## Materials from:

- Bergen Recycling, Inc.
- Bogota Recycle Depot

## How to Play:

To make the best sound, strike the center of the chime with the mallet. Strike once quickly and let the sound ring. Strike the bells quickly with the eye screw.
